

Serie EVOLUTION

Pompe disincrostanti con invertitore di flusso

EVOLUTION SERIES: the new way to devise descaling pumps. All the pumps in the EVOLUTION series are fitted with a special hermetic cap (AQUAMAX Patent Pending) in shockproof and anticorrosive plastic with the function of hermetically sealing the pump to prevent exhalation of chemical substances that cause corrosion to metallic materials (means of transport, equipment, laboratories, etc.). Furthermore the cap contains all pipes and cables making the pump compact and easier to handle and transport. All the pumps in the EVOLUTION series are fitted with the new POWERFLUX flow inverter. Power, safety and reliability without comparison.

Code	Article	Tank (Lt)	Dimens. (cm)	Max pressure (bar)	Maximum capacity (lt/h)	Class of protection (IP)	Rating (HP)
